

K44 POLY-TIPPED HARROWS

K44 Poly-Tipped Harrows with a large high-wearing replaceable tine, fully adjustable angle and durable steel drum, ideal for increased seed soil contact in the presence of trash.

The popular K2000 Modular Rotary Harrow range has been expanded by the inclusion of the K44 Polymer Rotor. The replaceable polymer tips are made of a high grade polymer designed for maximum wear resistance and shock loading.

Rotor widths are available from 1.2m to 1.8m and they can be mounted on a single mount arm or the 3000 Series Multi-System. On the 3000 Series Multi-System the K44 Polymer Harrow can be interchanged with Press Wheels, Spring Tine Harrows and Coil Packers.

- Versatile - lightweight
- Robust - high grade polymer used
- Widths - from 1.2m to 1.8m
- Interchangeable with:
 - 3000 Series Multi-System
 - 1000 Series Spring Tine Harrows
 - 5000 Modular Coil Packers
 - K2000 Rotary Harrows
