

SPRING INTO ACTION WITH K-LINE!

With the way the season is shaping up so far, summer looks to be a promising cropping season. Hopes are high for producing high yields and maximum profitability. However, these bumper seasons/crops often leave heavy trash residue in their wake, creating problems for future crops.

Do not despair, the **K-Line Speedtiller** is the ideal solution to help you combat your trash and get rid of those obnoxious summer weeds.

The Speedtiller covers a range of applications that include efficient seedbed preparation, effective weed control and excellent stubble incorporation. It has been successfully trialled in mature fleabane, wheat stubble, corn, cereals, melons, rye grass, hog weed and viny weeds.

One of the unique features of the Speedtiller®, which no other similar heavy-duty machine can boast, is the easy-to-operate lateral disc adjustment which allows Speedtiller operators to adjust front-to-rear disc cutting correlation.

The Speedtiller is in high demand! Now is the time for you to be proactive & put a spring in your step!! Order now to guarantee your Speedtiller is ready to **fight your weeds** and trash at the ideal time, ensuring your success and preparing your ground

for the next sowing season.

Did you know...K-Line is having a **BONZA CLEARANCE** of their stock rakes?

Raking is necessary to accelerate curing of hay and to reduce the number of machinery passes over the hay field during baling, moving and storing of hay. This is more time and fuel efficient: you have your hay in bales while your neighbour is still getting his machine out of the shed!

We suggest you look at the Australian-made K-Line Rake line up, as they are highly sought after because of their excellence in design, proven reliability, and well-reported backup service. Remember, the early bird catches the worm!

Our range of V-Rakes are designed to suit those touch demanding jobs that a bumper hay season will bring. Models range from 8 reels with 5.6m operating width to 28 reels with 14.6m operating width. Some of the many options available are two and four-reel splitter kits, rear-steer, and choice of reel types. Place your order now – start working smarter instead of harder, and witness the great return on investment!

We assure you, you will have no regrets when you put your K-Line rake to work this season.

Contact the friendly sales team at K-Line Industries on **1800 194 131** to ask for a quote, get more information, request a Speedtiller demonstration. www.k-line.net.au.

Work Smarter, Not Harder!
