DELTA COMPACT HAY RAKES

The Delta Compact Series V-Rake is a robust Australian built hay rake designed to meet and exceed the needs of Australian farmers & graziers.

The Compact Series Rake represents outstanding value for money:

- The latest in safety features to ensure safe transport and operation
- Designed specifically for Australian conditions
- A comprehensive range of features usually only available on more expensive rakes
- Efficient operation allows ease of baling while maximising hay quality
- Features independent reels to improve efficiency
