## Increase Organic Matter & Soil Health with K-Line's *SPEEDTILLER*

- Outstanding seed bed preparation
- Increase organic matter in your soil
- Save chemicals
- Save fuel
- Save time
- Proven residue manager
- Australian made

The recently released K-Line *SPEEDTILLER* sets a new standard in cultivating and renovating soils in the presence of high volumes of stubbles and residues. This heavy duty disc machine is designed to operate at high speeds (i.e. 10-18km/h), cutting up residues and incorporating them in the top layers of soil.

All discs are individually mounted on rubber suspensions with heavy duty bearing assemblies allowing maximum working depths and excellent soil conditioning. A crumbler roller is attached to the rear of the machine with hydraulic or manual adjustment to give the desired working depth.

**Put the *SPEED TILLER* to the test and prove the benefits of its high fuel efficiency, time-saving and reduced wear & tear over traditional tillage systems.** The *SPEED TILLER* can be supplied in vineyard and orchard models down to 1.75m wide, through to 6m machines with full hydraulic lift & fold.

## THE 'ALL NEW' *GR SERIES* ROTARY RAKES

Responding to numerous requests, K-Line has launched two three-point-linkage rotary rake models into the market to complement its existing range of twin rotor rakes. These heavily constructed *GR* Rakes are very well designed with all the necessary features to meet the demands of the most serious farmer or contractor.

Contact the team at K-Line today on 1800 194 131 to find out more about these robust units.

### Features include:

- Oil bath cams
- Pivoting headstock
- Heavy duty walking axle undercarriage
- Narrow transport width
- Hydraulic basket control (on GR460)
- 13-arm tine action (on GR460)
- 9-arm tine action (on GR330)
- Raking width to 4.6m

**INNOVATIVE FARMING SOLUTIONS**

## DELTA SERIES V-RAKES

Options include:

- Hydraulic fold
- Rear steer
- Splitter kits
- Fast, efficient windrow width adjustment
- Full splitter options
- Tandem rear axle

## DELTA COMPACT SERIES V-RAKES

- Cost efficient
- Independently sprung reels

- Robust, rugged design
- Hydraulic lift

## 9600 Twin Rotor Rotary Rake

- Cleaner hay sample
- Optional side delivery (9700)

- Oil-bathed cam rollers
- User friendly adjustment

## EASY-FIT K55 Coulter Kits

## 2700 Series Trashcutter

## K2000 Rotary Harrows

## 1000 Spring Tine Harrows

## DX Series V-RAKES
